PROFESSIONAL SUMMARY

Frontend Developer with 10+ years of experience building complex, data-heavy web platforms. Specialized in React, TypeScript, and real-time, interactive UIs for SaaS and production systems. Strong ownership mindset with experience spanning architecture, delivery, and long-term maintainability.

KEY SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), CSS/SASS, SVG, animations

State & Data: Redux, Context API, REST APIs, GraphQL

Testing & Quality: Jest, React Testing Library, Cypress, TDD

Platform & Tooling: Git, CI/CD, AWS, GCP, Vercel, Webpack, Vite

WORK EXPERIENCE

Senior Front end Developer (Contractor)
Elton Cyber – United States (Remote)
January 2025 to June 2025

- Played a key role in rebuilding a cybersecurity SaaS platform using React and TypeScript, improving performance, architecture, and maintainability.
- Led development of an interactive diagram visualization system using JointJS to model cybersecurity entities and relationships.
- Implemented high-performance data tables with AG Grid, supporting large datasets with advanced filtering and sorting.
- Contributed to a shared component library and collaborated closely with backend teams on Node.js APIs.

Senior Software Engineer (Contractor)
Yard Management Solutions LLC - Duluth, GA, United States (Remote)
February 2022 to October 2024

- Led migration of a legacy jQuery system to a modern React architecture, enabling scalable

feature development.

- Designed and implemented a real-time GPS tracking system for trucks across multiple facilities.
- Evolved an SVG-based yard visualization tool with drag-and-drop, zooming, and live updates.
- Collaborated with backend teams on Laravel APIs to deliver consistent, production-ready features.

Co-founder & Lead Developer
Goember Inc – Montréal, QC
Nov 2019 – Feb 2025

- Co-founded and led the technical development of an in-car entertainment and payment platform deployed in taxis across multiple U.S. cities.
- Architected and built the full platform: React web app, CMS, cloud infrastructure, APIs, databases, and deployment pipelines.
- Developed a secure in-vehicle payment solution integrating Stripe and real-time ride data.
- Integrated with taxi dispatch systems (iCabbi, zTrip) to enable live content and ride coordination.
- Supported device deployment, monitoring, and long-term system reliability in production environments.

Front end Developer -> Lead Developer
Contobox Inc - Montréal, QC
June 2015 to November 2021

- Progressed from Frontend Developer to Lead Developer on a React-based ad-tech SaaS platform.
- Led frontend architecture and mentored developers while contributing hands-on to core product features.
- Built dynamic, data-driven ad experiences and internal tools used to manage large-scale digital campaigns.
- Collaborated closely with backend teams to deliver performant, production-grade systems.

EDUCATION

Bachelor's in Computer Science
Nueva Esparta University - Caracas, Venezuela
