PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years building data-heavy, performance-critical web platforms. Hands-on experience with JavaScript, TypeScript, React, browser APIs, real-time data, and SVG-based visualizations deployed across diverse production environments, from ad-tech experiences embedded on thousands of third-party publisher sites, to in-vehicle systems running 24/7 in taxis, to enterprise SaaS dashboards.

KEY SKILLS

Core: TypeScript, JavaScript (ES6+), CSS/SASS, SVG, animations

Frameworks: React, Next.js, Redux, Context API

Backend & Data: Node.js, REST/JSON APIs, web scraping, GraphQL, WebSockets, Stripe integrations

Testing & Quality: Jest, React Testing Library, Cypress, TDD

Platform & Tooling: Git, CI/CD, AWS, GCP, Vercel, Webpack, Vite

WORK EXPERIENCE

Senior Front end Developer (Contractor)

Elton Cyber – United States (Remote)

January 2025 to June 2025

- Rebuilt a cybersecurity SaaS platform using React and TypeScript, improving performance, architecture, and long-term maintainability.
- Led development of an interactive diagram visualization system using JointJS to model cybersecurity entities and relationships, with custom event handling for large graphs.
- Implemented high-performance data tables with AG Grid, supporting large datasets with advanced filtering, sorting, and virtualization.
- Contributed to a shared component library and collaborated closely with backend teams on Node.js APIs.

Senior Software Engineer (Contractor)

Yard Management Solutions LLC - Duluth, GA, United States (Remote)

February 2022 to October 2024

- Led migration of a legacy jQuery system to a modern React + TypeScript architecture, unblocking scalable feature development across the product.
- Engineered a high-performance SVG-based yard visualization rendering hundreds of entities in real-time, with custom drag-and-drop, pan/zoom, and WebSocket-driven live updates.
- Designed and implemented a real-time GPS tracking system for trucks across multiple facilities, optimizing rendering and event handling to maintain smooth interaction with large datasets.
- Collaborated with backend teams on Laravel APIs to deliver consistent, production-ready features.

Co-founder & Lead Developer

Goember Inc – Montréal, QC

Nov 2019 – Feb 2025

- Co-founded and led the technical development of an in-car entertainment and payment platform deployed in taxis across multiple U.S. cities.
- Architected and built the full platform: React web app, CMS, cloud infrastructure, APIs, databases, and deployment pipelines.
- Developed a secure in-vehicle payment solution integrating Stripe and real-time ride data.
- Integrated with taxi dispatch systems (iCabbi, zTrip) to enable live content and ride coordination.
- Supported device deployment, monitoring, and long-term system reliability in production environments.

Front end Developer -> Lead Developer

Contobox Inc - Montréal, QC

June 2015 to November 2021

- Progressed from Frontend Developer to Lead Developer on a React-based ad-tech SaaS platform.
- Led frontend architecture and mentored developers while contributing hands-on to core product features.
- Built dynamic, data-driven ad experiences and internal tools used to manage large-scale digital campaigns.
- Collaborated closely with backend teams to deliver performant, production-grade systems.

EDUCATION

Bachelor's in Computer Science

Nueva Esparta University - Caracas, Venezuela
